# First quarter 2012

#### Orders received

The Group's orders received grew organically by 1.2%. Despite a weak trend in orders received during the quarter, demand is deemed to be in line with plans and the Group continues to expect the rate of organic volume growth for the full-year to exceed the preceding year.

For Medical Systems, organic orders received rose by nearly 1%. In the year-earlier period, normalised orders received increased organically by 7% (adjusted for a major order from Brazil). Extended Care's orders received declined organically by 0.2%, primarily due to a weaker volume trend in North America, which experienced highly favourable orders received in the corresponding period in the preceding year. Infection Control's orders received rose organically by 3.6%, with strong growth in both North America and in the emerging markets.

The volume trend for the newly acquired Atrium, which is not included in the calculation of organic orders received, was very strong.

Teleconference with CEO Johan Malmquist and CFO Ulf Grunander 19 April 2012 at 3:00 p.m. Swedish time Sweden: +46 (0)8 506 857 59 (always use the area code) UK: +44 (0)207 108 6303

#### Results

Consolidated profit before tax was in line with the year-earlier period amounting to SEK 570 M (568). SEK 7 M of the acquisition of Atrium was charged to the quarter's profit before tax, which was in line with expectations. For the full-year, Atrium is expected to contribute to the Group's profit before tax. The Group's EBITA for the first quarter of the year rose by 6.6% and the EBITA margin was 16.3% (17.2).

Medical Systems and Extended Care improved their EBITA by 9.3% and 9.0%, respectively. Infection Control's EBITA declined by 10.8%.

Consolidated cash flow from operating activities rose by 15.0%, corresponding to a cash conversion of 64% (61). At the end of the quarter, the net debt/equity ratio was a multiple of 1.10 (0.95).

## Outlook

The Group anticipates that the rate of organic volume growth will improve further in the current year compared with 2011. The markets outside Western Europe and North America, which have grown steadily in importance, are expected to continue demonstrating a favourable level of demand. The North American market is expected to improve, albeit at a slower pace, while the West European market is expected to remain sluggish. The on-going roll-out of recently launched products continues to contribute to organic growth.

Efficiency enhancements of the Group's supply chain, with such actions as a successive reduction in the number of production units and a growing portion of purchases from low-cost countries, will, combined with an improved volume trend, result in the profit growth remaining favourable.

The business area's orders received rose organically by 0.8%. In the year-earlier period, orders received – adjusted for a major order from Brazil – increased organically by approximately 7%. In the Western European markets, orders received rose organically by 0.5% and all regions, excluding Southern Europe, experienced a positive trend. In the North American market, orders received declined organically by 10% compared with the corresponding period in the preceding year when a major order of incubators was secured in Canada. In the markets outside Western Europe and North America, the volume trend was solid overall.

EBITA rose by 9.3% to SEK 424 M (388). The EBITA margin was 15.8%, down one percentage point. Atrium made a positive contribution to both EBITA and the EBITA margin. Invoiced sales declined organically by 1.7% during the quarter, while the cost trend was moderate when adjusted for costs that arose due to the Atrium acquisition.

## **Activities**

#### **New Executive Vice President of Medical Systems**

During the quarter, Heinz Jacqui assumed his position as the new Executive Vice President of Medical Systems. Heinz Jacqui possesses more than 25 years' experience from the medical-technical industry, most recently as President of Olympus' surgical endoscope business; an operation that generates sales of about SEK 8 billion. Heinz succeeds Dr. Heribert Ballhaus, who retired as planned.

## **Integration of Atrium Medical Inc**

Efforts to incorporate Atrium Medical in the business area's structure are proceeding as planned. The quarter was not charged with any of the restructuring costs, which are expected to total USD 6 M for 2012 and 2013. Atrium Medicals' performance during the first quarter of the year was entirely in line with expectations and the operation continues to report high organic growth.

## Restructuring activities

Two restructuring programs are currently being conducted in Medical Systems with the aim of further strengthening the competitiveness of the Cardiovascular division. Costs for the two structural projects were fully expensed by year-end 2011.

The first restructuring program pertains to enhancing the production efficiency of consumables for cardiopulmonary machines. The programme involves the closure of two units in Hechingen and Hirrlingen, in Germany, and the relocation of the production concerned to the business area's existing plant in Antalya, Turkey. In conjunction with the production relocations, the headquarters for the Cardiopulmonary operation will be relocated from Hechingen to Medical Systems' headquarters in Rastatt. The restructuring program, which was largely completed during the year, will lead to annual savings of about SEK 60 M.

The other restructuring program, which was announced during the fourth quarter of the preceding year, aims to consolidate all manufacturing of textile-based vascular implants to the unit in the French city of La Ciotat, which entails that current vascular implant manufacturing at the plant in Wayne in the US will be relocated to La Ciotat. In addition, the Cardiovascular Division intends to transfer its production of balloon catheters from the unit in Fairfield, in the US, to the plant in Wayne, thus enabling a reduction of the production structure by one plant unit. The restructuring programme is expected to generate annual savings of about SEK 80 M as of mid-2013.

## Favourable results from clinical trials

During the period, the results from two key clinical trials were published in major peer-reviewed medical journals. Both trials pertain to products that were developed and manufactured by Atrium Medical.

The first trial, which is designated the Covered versus Balloon Expandable Stent Trial (COBEST), compared treatment results using Atrium's covered stent, Advanta V12, to traditional balloon expandable metal stents during interventions of the iliac artery. The randomised, multi-centre study indicates that patients with Atrium's Advanta V12 had significantly lower risk of restenosis and fewer reinterventions than patients with bare metal stents. The study was published in the Journal of Vascular Surgery.

The second clinical trial pertains to Atrium Medical's ClearWay RX infusion catheter, which is used to deliver thrombolytic medication to a coronary artery that has been blocked by a blood clot. The international, randomised, multi-centre trial named INFUSE-AMI was aimed at measuring whether damage to the cardiac muscle that arises during major myocardial infarctions (heart attack) can be reduced if a thrombolytic medication is delivered directly to the blood clot using Atrium's ClearWay RX. The study used the thrombolytic medication abciximab together with ClearWay RX and indicates that the scope of damage to the cardiac muscle was significantly reduced at 30 days as measured by highly sensitive cardiac MRI. The scope of damage to the cardiac muscle was further reduced when the ClearWay RX treatment was used in conjunction with an aspiration catheter. The study was presented as a Late Breaking Clinical Trial at the American College of Cardiology annual symposium in Chicago on March 25th and was simultaneously published in the Journal of the American Medical Association.

Extended Care's orders received declined organically by 0.2% during the quarter. The volume trend in Western Europe was positive and the improvement in demand in the UK offset the weak trend in Southern Europe. In the North America market, orders received declined organically by 8.5%, compared with the strong year-earlier period when orders received rose organically be nearly 18%. In the markets outside Western Europe and North America, the volume trend was highly favourable overall.

Orders received grew organically by 3.6%, which was a solid rise considering orders received during the year-earlier period increased by 7.4%. In Western Europe, orders received declined organically by 10.8%. In the corresponding period in the preceding year, an order was registered from the French company Areva for about SEK 90 M. Excluding Southern Europe, orders received in Western Europe were strong during the quarter. In the North American market, orders received increased by 6.2%, primarily as a result of demand from hospital customers in the US. Growth in the Asian markets was very strong.

# Other information

# **Accounting**

This interim report has been prepared for the Group in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act. For the Parent Company, the report has been prepared in accordance with the Swedish Annual Accounts and RFR 2. The accounting policies adopted are consistent with those applied for the 2011 Annual Report and should be read in conjunction with that Annual Report.

This report has not been audited by Getinge's auditors.

## New accounting policies for 2012

New or revised International Financial Reporting Standards (IFRS) and statements of interpretation from IFRIC as described in Note 1 of the 2011 Annual Report had no material impact on the position or performance of the Group or Parent Company.

# **Risk management**

Political decisions altering the healthcare reimbursement system represent the single greatest risk to the Getinge Group. The risk to the Group as a whole is limited by the fact that Getinge is active in a large number of countries. The Group's operational risks are limited, since customer operations are generally funded directly or indirectly by public funds. The Group's Risk Management team continuously works to minimise the risk of production disruptions.

Elements of the Getinge Group's product range are subject to legislation stipulating rigorous assessments, quality control and documentation. It cannot be ruled out that the Getinge Group's operations, financial position and earnings may be negatively impacted in the future by difficulties in complying with current regulations and demands of authorities and control bodies or changes to such regulations and demands.

Financial risk management. Getinge is exposed to a number of financial risks in its operations. "Financial risks" refer primarily to risks related to exchange and interest rates as well as credit risks. Risk management is regulated by a financial policy established by the Board of Directors. The ultimate responsibility for managing the Group's financial risks and developing methods and principles of financial risk management lies with Group management and the treasury function. The main financial risks to which the Group is exposed are currency risks, interest-rate risks and credit and counterparty risks.

# **Forward-looking information**

This report contains forward-looking information based on the current expectations of the Getinge Group's management. Although management deems that the expectations presented by such forward-looking information are reasonable, no guarantee can be given that these expectations will prove correct. Accordingly, the actual future outcome could vary considerably compared with what is stated in the forward-looking information, due to such factors as changed conditions regarding finances, market and competition, changes in legal requirements and other political measures, and fluctuations in exchange rates.

### **Next report**

The next report from the Getinge Group (second quarter of 2012) will be published on 10 July 2012.
