

SOCIAL FINANCING REPORT

September 2022

INTRODUCTION

On Thursday 3 June 2021, Getinge successfully priced a 3-year SEK 570m Social bond transaction. This transaction constitutes Getinge’s re-entry to the bond market and the company’s first Social Bond. The bond was issued to finance projects that include positive social impacts.

This pioneering bond issuance continues to support Getinge’s long-term ambition to lead the way in creating and sharing sustainable value. It attracted significant appetite from investors focused on Environment, Social and Governance (ESG) and was subscribed at attractive market conditions. Proceeds will finance increased production capability of two essential medical products linked to the treatment and mitigation of Covid-19;

- ECMO’s – Advanced ventilation equipment, extracorporeal membrane oxygenation (ECMO) systems, also known as extra corporeal life support (ECLS) equipment, advanced monitoring for Intensive Care Units.
- DPTE-BetaBags® – Aseptic transfer system, used in the production of vaccines.

The proceeds from the issuance will be used to finance new projects in accordance with Getinge’s newly established Social Financing Framework. The eligible Social category targets Access to Essential Healthcare Services.

Sustainalytics, an ESG rating agency, has delivered an independent second opinion on the sustainability credentials and management of this social bond that are available at the Getinge website. The second opinion by Sustainalytics finds the framework “credible and impactful” and to be structured in line with ICMA’s Social Bond Principles.

For more information on our social bond, refer to Getinge Social Financing Framework, which is available at Getinge website.

Maturity	10 June 2024
Coupon	3 Month Stibor +70bp (quarterly Act/360)
Documentation	Issuer's MTN-programme
Listing	Nasdaq Stockholm – Sustainable List
Leads	Handelsbanken Capital Markets & SEB

ALLOCATION REPORT

Getinge has established a Social Financing Committee to evaluate and select Eligible Projects that are in line with the criteria set out in the Use of Proceeds section. The Social Financing Committee meets on an annual basis or more frequently if required. Allocation of the proceeds has been annually audited.

The allocation of Social Bond proceeds to Eligible Projects from issuance until Q1 2022 was 134,3 MSEK. The detailed allocation per project is set out in the chart and table on next page.

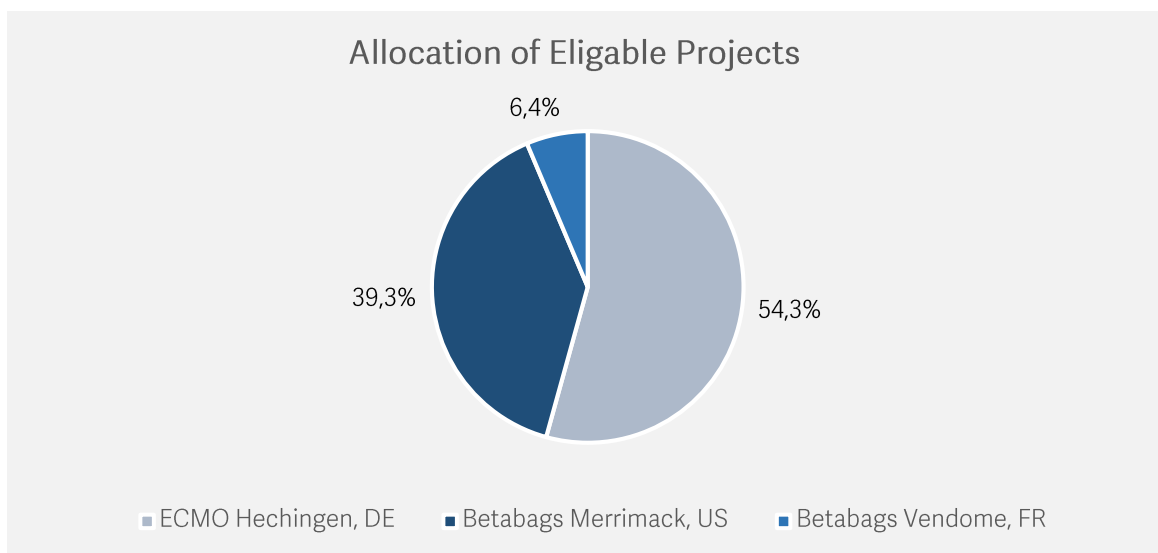

From the bond issuance in June 2021 until end of March 2022, the number of ECMO/ECLS amounted to 59.770 units, which is about 1.672 units below the production plan and the main reason for the deviation was decreased demand in various markets (less COVID cases than last year and lower flu season). The number of patients receiving treatment is directly linked to the units produced which means that a minimum of 59.770 patients more has received ECMO treatment during the period.

The number of DPTE-BetaBags® units produced in the Vendome facility during the period from the bond issuance until end of March 2022 amounted to 454.911 units and for the Merrimack facility the number of units produced for the same period was 8.959.

Table 1 - Eligible Projects from issuance until Q1 2022

Eligable projects	Allocated amount in MSEK Q1 2022	Total in MSEK
ECMO Hechingen, DE	3,1	68,0
Betabags Merrimack, US	6,8	53,8
Betabags Vendome, FR	4,9	12,6
Total in MSEK	14,8	134,3

EXTERNAL REVIEW

External independent auditors has been appointed by Getinge to ensure that the Allocation Report is consistent with Getinge's Social Bond Framework, on an annual basis until the full allocation. Auditor's scope has been limited to assurance of "Table 1 – Eligible Projects from issuance until Q1 2022" of the report.

Please find the 2022 Assurance Report from our Auditors published at Getinge website.
