

Atrium Express Mini 500 and Pneumostat

Mobile chest drains

Atrium Mobile chest drainage products from Getinge are lightweight and ergonomic for easy patient ambulation. The Express Mini 500 and Pneumostat feature a dry seal one-way valve for convenient set-up and maximum patient protection in any position.

Express Mini 500

The Express Mini 500 is a full-featured mobile chest drain. These small, portable drainage collection units with pre-set suction help patients become ambulatory with the convenient, easy-to-wear "get mobile" size.

The Express Mini 500 incorporates a 500 ml collection volume, and a patented automatic pre-set suction regulator at $-20 \text{ cmH}_2\text{O}$. In addition, the Express Mini design includes a dry seal one-way valve in a lightweight, ergonomic configuration for patient protection.

Pneumostat

The Pneumostat Chest Drain Valve is a disposable, single-use chest drain valve with a small, graduated 30 ml collection capacity integrated with a novel one-way dry seal valve technology.

The Pneumostat Chest Drain Valve is easy-to-use, providing patients excellent protection with a low-cost solution.

Express Mini 500 Dry Seal Chest Drain
