

Tec-Quat 128

one-step disinfectant cleaner, sanitizer, fungicide, mildewstat, virucide and deodorizer.

Dear: Valued Getinge Customer

Tec-Quat is a one-step Hospital use disinfectant which has demonstrated effectiveness against viruses similar to 2019 Novel Coronavirus (2019-nCoV) on hard, non-porous surfaces. Therefore, Tec-Quat 128 can be used against the 2019 Novel Coronavirus (2019-nCoV) when used in accordance with the directions for use against Norovirus on hard, non-porous surfaces. Please refer to the CDC website for additional information: www.cdc.gov/coronavirus/2019-ncov/index.html¹

Please note, as 2019-nCov is an emerging pathogen, the **recommended dosage is 1 ounce per gallon of water**, and the **contact time is 10 minutes**. Please ensure the surface remains wet during that contact time. One gallon of diluted disinfectant will cover 800 - 1,000 square foot. For visibly soiled surfaces, preliminary cleaning is required.

While no current EPA registered disinfectants have claims regarding this specific virus, any product that qualifies for emerging pathogen claims per the EPA's "Guidance to Registrants: Process for Making Claims Against Emerging Viral Pathogens not on EPA-registered Disinfectant Labels" can make the following claim (Tec-Quat 128 can make this claim).

For a full list of products that have been pre-approved by the U.S. Environmental Protection Agency (EPA) for use against emerging enveloped viral pathogens and can be used during the 2019 Novel Coronavirus (COVID-19) outbreak: www.americanchemistry.com/Novel-Coronavirus-Fighting-Products-List.pdf
