

Tomorrow's efficient healthcare created today

Planning & Design

The efficiency of your care outcomes is highly dependent on a smooth and streamlined workflow throughout your hospital. We offer planning and design of your facility, be it a room or a whole department, and workflow concepts with visual renderings. We have a decade of expertise in working closely with architects, planners and clinicians.

Planning for a better hospital experience

As a manufacturer of premium hospital equipment and a provider of clinical solutions, we understand the demands you face every day. We offer efficient workflow solutions to overcome your challenges in the OR, ICU, and sterile reprocessing department, so you can focus on what you do best — caring for patients.

3D visualization support

Using the latest technology in 3D drawings, we will support your team in making informed decisions on the optimization of your hospital workspace. Also, you can make use of BIM-ready CAD symbols for efficient planning.

IT integration

You can effectively improve the clinical environment, with our state-of-the-art hospital efficiency software solutions. Our solutions help create a better, safer, and calmer hospital experience for both staff and patients.

Project realization

Our experienced Getinge Planning and Design team is your single point of contact. We work closely with you, from start to final handover, to complete your project on time and aligned to your budget.

Part of Getinge 360° Services

To provide you with the best possible service, we consider the entire journey of healthcare delivery. 360° Services by Getinge encompasses value creation partnerships and financial solutions, planning and design of workflows, project implementation, education and training, digital services, and maximized equipment uptime through preventative maintenance.

Getinge 360° — full-circle service aligned to your operational and financial goals.
